SECURITY and INTELLIGENCE are two extremely important, even fundamental aspects for maintaining stability and security in a society. Without them we cannot discuss about life, about the world, or existence.

### **Moderator / Coordinator/Keynote Speaker**

SECURITY has been and will remain essential whatever the field of manifestation. Whether we are talking about the politico-military, economic and social, food, health, transport and communications, the environment, everywhere we need a minimum level of security.

This can be achieved only through a good and timely knowledge of the situation, through analysis and anticipation, therefore through data and information, collected, processed, analyzed and exploited in time, that is through INTELLIGENCE.
